How to setup cakeupload

| 1	Place your project at hosting site for my case localhost (xampp)
2	My username and password for database is | Username	root
password	abc123 | If u want to change this credential to your own credential there is 2 places need to change: cp-imgupload\app\webroot\core\database\connect.php and cp-imgupload\app\Config\database.php After login to phpmyadmin: 1)Click 2)name your database name cakeupload 3)click go 4) click import 5) click browse 6) choose the folder where you download your project, and find the file below

3	Make sure your localhost file and database server is running
	Modules **Service Module PID(s) Port(s) Actions** ✔ Apache 1592 80, 443 Stop ✔ MySQL 2448 3306 Stop
4	Go to your web browser addressbar, type localhost/<yourprojectpath>/cp-imgupload Yourprojectpath may be vary depend on where you place your file.
